My dear Sir,

There has recently been a case of Cholera in the residential Quarters of the Students in the Maharaja's Sanskrit College. It proved fatal. Some dead rats have also been found there. The Health Officer who has since inspected the premises thinks - that some improvements are called for. I beg to enclose a copy of his communication on this subject. An Estimate is being made out of the cost of the improvements he suggests and will be submit - ted, as soon as it is ready.

Meantime, the secretary, to the College Committee, having brought to notice the inconvenience the College has been put

put to for some time past on account of its Southern Wing being in the occupation of Mr. M.Shama Rao, Superintendent, Palace - Stables, Mr. Shama Rao was duly written to in the matter, and with the kind approval of His Highness it has been arranged that h e should quit the Block he lives in, by 1st February next. The whole premises will then be subjected to thorough cleaning & disinfection

In these circumstances, it has become necessary to close the College till 1st February 1907.

Yours sincerely,

21/12/06

No: 756 D/- 8th December 06.

To,

The Officer in charge of the Palace Estts.

I have the honor to inform you that as some dead rats were found found in the Students' Quarters attached to His Highness the Maharaja's Sanskrit College, and as these Quarters being in close proximity to the infected area where several cases of plague occur every day, it is rather dangerous to have the students in these Quarters for - fear of catching infection and to hold the College Classes here for the same reason, as such, I am of opinion to have the College closed for some time till the infection is abated. Meanwhile, the Students' Quarters which are in an insanitary condition might be improved a s suggested below : -

1. The whole roofing is to be replaced by Mangalore tiled roofing with sky-lights.

2. Before altering the roofing the walls of the building might be raised to a foot and a half or two in height with ventila - tors at the top.

3. Other windows ought to be provided for each room opposite to the one in existence.

4. The floor ought to be raised a foot and paved with - flooring tiles.

5. Proper concrete drains ought to be constructed around these quarters for free flow of water. The old "V" shaped drains in the building might be improved in the same way.

6. The latrines ought to be built in a modern pattern or fresh septic latrines may be constructed.

I have the honor to be, &c.

Sd/- M.Jagannatham,

Health Officer.
